Samira Qureshi

Senior AI Engineer

Fictional test candidate - no real contact information

PROFESSIONAL SUMMARY

AI engineer with six years of experience shipping Python services, retrieval systems, and AI-assisted workflows.

TECHNICAL SKILLS

Python, FastAPI, LangChain, LangGraph, RAG, LLMs, Pinecone, pgvector, Docker, Kubernetes, AWS, REST APIs, evaluation pipelines, monitoring.

PROFESSIONAL EXPERIENCE

Senior AI Engineer | Northstar Systems | Jan 2022 - Present

- Built production FastAPI REST APIs serving document question answering using RAG and LLMs.

- Designed LangGraph agent workflows with tool execution, human approval steps, and tracing.

- Improved retrieval precision at five by 18 percentage points on a 600-query labeled benchmark using hybrid search and reranking.

- Containerized inference and API services with Docker and deployed them on AWS Kubernetes.

- Developed evaluation pipelines for hallucination checks, regression tests, latency metrics, and monitoring dashboards.

AI Engineer | Beacon Labs | Jul 2020 - Dec 2021

- Integrated LangChain retrievers with a Pinecone vector database for internal knowledge search.

- Reduced median answer latency from 3.2 seconds to 2.1 seconds after batching requests.

PROJECTS

Enterprise Support Copilot | 2024

Objective: Provide cited answers to internal support teams.

Responsibilities: Implemented document ingestion, chunking, embeddings, authorization filters and REST API endpoints.

Outcome: Reduced manual lookup time in a controlled pilot by 22%.

EDUCATION

BS Computer Science | Sample Technology University | 2016 - 2020
